

Help – Hilfe zur Selbsthilfe in Ukraine

Help – Hilfe zur Selbsthilfe is an international humanitarian organization with more than 40 years of experience in humanitarian aid and development assistance. Headquartered in Bonn, Help is active in more than 20 countries.

Since Help was founded, we have been constantly working to empower people by providing emergency assistance and striving to effectively fight poverty, hunger and disease. Our goal is a world where all people can live in dignity and security.

Help in Ukraine projects are implemented with the financial support of:

and private donations

Our Approach

Through projects aimed at supporting small and medium-sized enterprises, we help ensure the development of many sectors of the country.

Help aims to give people in need the opportunity to take care of themselves. The organization cooperates with local partner organizations and involves local project participants in the planning and implementation of programs.

This helps to strengthen the forces of civil society in Ukraine.

Strategic partners of Help in Ukraine

Types of Aid

Shelter and NFI

We provide funds for renting housing, heating kits, solid fuel, non-food aid, and contribute to the repair of residential buildings together with our partners.

Agriculture

We provided fuel to farms and helped restore stables. We also provided heifers, medicines, and animal vaccines. Farmers also received premixes and vouchers for animal feed.

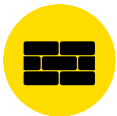

WASH

We provided hygiene kits, diapers, and emergency supplies of drinking water and necessary pumps. Together with our partners, we provided equipment to restore a well. We helped to restore the water supply system. We provided the necessary repair materials to restore the heating system.

Health

Since the start of the full-scale war, it is estimated that 16,430,000 people in Ukraine have needed healthcare assistance. We are providing healthcare facilities with essential medicines and medical equipment and special vehicles to transport patients to community outpatient clinics.

Institutional Support

We provide institutions and organizations with winterization assistance and fuel cards. We support critical infrastructure facilities, set up shelters in educational institutions and provide them with furniture and equipment. We are restoring electricity supply to communities. We provide the necessary equipment and devices to the SES units.

Food Parcels

Together with our partners, we distribute food parcels in different regions of Ukraine. We also distributed baby food and hot meals for internally displaced people and people living in shelters.

Cash

One of the ways we can respond quickly to the consequences of the hostilities is to provide multi-purpose financial aid. Providing financial support to those affected by shelling helps to restore a comfortable standard of living and meet basic needs in difficult conditions. We also provide grants for small businesses.

Protection

Together with our partners, we support survivors of violence by providing them with cash for rent and psychosocial support. The war-affected population and internally displaced people also receive psychological assistance, psychosocial sets and materials for children's development.

*Transfer of materials for the repair
of the water supply system.
Mykolaiv region, March 2024*

Operational Map

According to OCHA's Humanitarian Needs and Response Plan, 14.6 million Ukrainians are in need of humanitarian assistance in 2024.

- Of these, 3.9 million are internally displaced.
- 10 million adults and 1.5 million children are in need of mental health support
- About 3.3 million people need assistance in frontline communities in the east and south of the country
- Since February 2022, 65% of Ukrainian households have faced a reduction in income, and almost 44% of them cannot meet their basic needs

Since the beginning of 2024, Ukraine has faced an intensification of shelling, which has led to an increase in civilian casualties and further destruction across the country. Increased attacks on critical infrastructure have resulted in power and heating outages for hundreds of thousands of people, and affected the operation of medical and educational facilities.

Taking into account the new needs, we have focused our attention on the regions of the country that are currently most affected by shelling and increased the amount of multi-purpose cash assistance to the affected population.

SUSTAINABLE DEVELOPMENT GOALS

Our projects act in accordance with the 17 Sustainable Development Goals of the United Nations. In particular, Goals 1, 2, 3, 4, 5, 6, 8, 9, 10, 11, and 16 are considered.
